

CHAITALI CHAUDHARI

GENAI ENGINEER

Bangalore, India | chaitalic275@gmail.com | 8805601955 | [LinkedIn](#) | [GitHub](#)

Career Objective

AI Engineer specializing in enterprise Generative AI, grounded RAG, and multi-agent automation for scalable, real-world systems.

Professional Summary

Generative AI Engineer with 3+ years of experience designing, deploying, and scaling enterprise-grade multi-agent AI platforms and RAG pipelines. Expert in LLM integration (OpenAI, Azure OpenAI, Hugging Face), vector databases (PostgreSQL pgvector, Pinecone), LangChain/LangGraph, and orchestration of AI workflows in production. Proven record of delivering solutions that reduce manual effort by 60–75% and improve enterprise decision-making accuracy.

Key Achievements

- Improved recruitment efficiency by 75% by designing and deploying a Generative AI-powered resume evaluation and shortlisting platform.
- Delivered enterprise-grade AI automation workflows using RAG, LangChain, LangGraph, and Apache Airflow, supporting scalable, production deployments.
- Built and productionized multi-agent AI systems with self-correcting workflows, significantly reducing manual intervention in complex AI-driven processes.
- Recognized with 'Pat on the Back' and 'Star Performer' awards for excellence in AI solution delivery and platform ownership.

Technical Skills

- **Programming & Scripting:** Python, SQL
- **Backend:** FastAPI, Flask, Streamlit, REST APIs, Async Programming
- **Generative AI:** LLMs, Agentic AI, Multi-Agent Systems, LangChain, LangGraph, Swarms, RAG, Grounding, Re-ranking, Prompt Engineering, Semantic Search, Embeddings
- **Models:** Azure OpenAI (GPT-3.5/4), OpenAI GPT, Gemini, Ollama, Hugging Face
- **Vector DBs:** PostgreSQL (pgvector), Pinecone
- **Data & Workflow:** Pandas, NumPy, Apache Airflow
- **Cloud & DevOps:** Azure, Docker, Docker Compose
- **Security:** OAuth2, OIDC, RBAC, Keycloak
- **Tools:** Linux CLI, tmux, Jira, Git

Certifications

- Complete Generative AI Course with LangChain and Hugging Face – Udemy
- Advanced Python Masterclass – Udemy
- Oracle AI Foundations Associate
- Cloud Computing – NPTEL

Professional Experience

Sigmasoft Infotech Pvt. Ltd – Bangalore, India

AI Engineer | 2023 – Present

- Built multi-agent AI platforms with LangGraph & Swarms, enabling self-correcting workflows and reducing manual intervention by ~60%.
- Developed grounded RAG pipelines with embedding-based re-ranking using Azure OpenAI & PostgreSQL (pgvector), reducing hallucinations by 40%.
- Engineered self-healing SQL and analytics agents for automatic query regeneration, cutting analytics turnaround time by 50%.
- Deployed scalable, secure backends with FastAPI, Docker, Airflow, and RBAC, supporting high-concurrency production workloads.
- Delivered enterprise AI automation workflows, improving operational efficiency by up to 75%.

Projects

Agentify Central – Enterprise AI Agent Orchestration Platform (Sep 2025 - Present)

- Built multi-agent platform enabling self-correcting workflows, reducing manual intervention by 60%.
- Developed intelligent agent-routing engine for SQL, RAG pipelines & conversational agents, improving task accuracy by 40%.
- Engineered self-healing SQL agent for automated analytics, cutting turnaround time by 50%.
- Integrated multiple enterprise data sources (Salesforce, ServiceNow, Snowflake, SQL) for unified agent access.
- Delivered secure, scalable backend with FastAPI, Docker, Keycloak RBAC, supporting high-concurrency workloads.

CISCO IT VMO – Shutdown Assistant (Nov 2024 – Aug 2025)

- Designed AI-driven automation platform for shutdown scheduling, reducing operational effort by 30%.
- Built agent-based architecture using LangGraph & LangChain for milestone calculation, DataFrame querying, and FAQ resolution.
- Integrated enterprise-grade security with Duo MFA, token-based authentication, and IP validation.

Sigma-Screen Resume Evaluation Tool (Apr 2024 – Oct 2024)

- Built LLM-powered resume evaluation platform with section-wise JD matching and structured evaluation reports, improving recruiter decision speed by 85%.
- Optimized semantic matching and prompt engineering to ensure accurate skill extraction.
- Deployed scalable backend using FastAPI, Streamlit, Docker, and PostgreSQL with RBAC for enterprise use.

Education

- **Master of Computer Application** – University of Mumbai (2021–2023) | 8.65 CGPA
- **Bachelor of Computer Science** – North Maharashtra University (2018–2021) | 9.45 CGPA

Awards

- Pat on the Back Award – For exceptional dedication and innovation on the Sigma-Screen project.
- Star Performer Award – Recognized in Cisco for outstanding AI contributions.
