📍 MBA – Business Analytics (Pursuing) — Symbiosis Institute of Management Studies

📍 Bachelor of Arts (English Literature) — DAVV, Indore, India

Work History Summary:

📍 Salesforce Product Owner / Senior Business Analyst — TEKsystems (Allegis Group), Client: ANSYS, Inc.

📅 June 2025 – Present

- Lead requirement analysis for Salesforce enhancements, defects, and new requests, performing impact assessment and prioritization based on business value.
- Translate business requirements into user stories, functional requirements, and acceptance criteria.

- Collaborate with Product, Engineering, and QA teams to support delivery of Salesforce solutions.
 - Support UAT planning and execution, including test scenarios, test case clarification, and issue tracking to closure.
 - Maintain requirement traceability and documentation across releases.
 - Work with channel partners and stakeholders to gather requirements and clarify business needs.
 - Support Salesforce CPQ and CRM integrations, defining workflows aligned with sales processes.
 - Participate in Agile ceremonies including backlog refinement, sprint planning, and defect triage.
-

 Salesforce Business Analyst / Product Owner — Magicbricks (Times Group)

 July 2022 – June 2025

- Gathered and analysed business requirements for Salesforce-based applications.
 - Translated requirements into BRD, FRD, user stories, and acceptance criteria.
 - Acted as a liaison between business stakeholders and engineering teams.
 - Supported product backlog refinement and prioritization with stakeholders and product teams.
 - Supported Salesforce CPQ implementations, including product lookup configuration, pricing logic, and discount approval workflows.
 - Implemented Service Cloud case management, defining case flows, escalation rules, and SLA processes.
 - Supported third-party CRM integrations, including push integrations and custom integrations, to enable data flow across systems.
 - Contributed to optimization of lead-to-order and customer support workflows using Salesforce CRM and CPQ.
-

 Salesforce – Business Analyst, Nexus Pvt Ltd (Fintech Domain)

 September 2017 – July 2022

- Worked as a Business Analyst in the fintech domain, supporting banking and payment-related applications.
 - Supported salary processing workflows for Qatar National Bank, including integration with third-party card systems (QPAY), ensuring accurate transactions and timely processing.
 - Gathered and analysed business requirements for bank web portals, mobile applications, POS machine workflows, and sales support systems.
 - Worked on transactional and promotional SMS workflows in the telecom domain, supporting requirement analysis, delivery coordination, and compliance with business and regulatory needs.
 - Improved the in-house call receiving process by analysing customer call flows, IVR journeys, and issue resolution patterns to enhance response time and customer experience.
 - Supported real-time sales and transaction tracking, analysing data and identifying gaps impacting operations.
-

KEY PROJECTS

🔴 EUC Project – Salesforce & DocuSign (ANSYS)

- ✔ Supported end-to-end EUC (End User Certificate) implementation using Salesforce and DocuSign, covering Sales Admin, System Admin, and Recipient user flows.
 - ✔ Worked on DocuSign integration, validating document generation, recipient handling, email notifications, and envelope status updates.
 - ✔ Coordinated with Product, QA, Legal, and channel partners to clarify requirements and ensure compliance-driven workflows.
-

🔴 DSR Project – Salesforce (ANSYS)

- ✔ Supported requirement analysis and delivery for the DSR (Deal / Data Submission Request) initiative within Salesforce.
- ✔ Verified end-to-end DSR workflows, including status updates, data accuracy, and downstream impact.
- ✔ Collaborated with business stakeholders, Sales teams, channel partners, Technical Architects, Product, and Engineering teams to clarify requirements and define system behavior.

🔴 Sales Pricing & Approval Workflow Automation -(Magicbricks)

- ✔ Worked on product configuration, pricing rules, and discount approval workflows in CPQ. Collaborated with Sales, channel partners, Product, and technical teams to align business needs with system functionality.
 - ✔ Supported custom CRM integrations, including push integrations and real-time lead capturing, to ensure seamless data flow and timely sales processing.
 - ✔ Supported Service Cloud ticket implementation, enabling service support teams to track, manage, and resolve customer tickets efficiently.
-

🔴 Qatar National Bank (QNB) – Banking & Payments Project

- ✔ Supported salary processing workflows for QNB, including integration with third-party card systems (QPAY).
 - ✔ Gathered and analysed business requirements for bank web portals, mobile applications, and POS machine workflows.
 - ✔ Worked on payment and transaction flows, ensuring accuracy and timely processing.
-
