

CAREER SUMMARY

Experienced Azure cloud engineer with 4 years of experience in Azure cloud services, Azure devops services and infrastructure management. Proficient in managing Azure resources, networking and security. Adept to agile methodology with a proven record of enhancing operational efficiency and security.

TECHNICAL SKILLS

Automation | Azure Services | Azure devops | Azure Portal | Storage account | Backup | Disaster recovery | Microsoft Entra ID | Azure AD | RBAC | SSO | MFA | Virtual machine | Load Balancer | CI/CD | IAC | Networking (V-net, Subnet, NSG) | Azure Firewall | Azure key vault | App gateway | WAF | AKS | Bicep | Azure front door | Azure security | Terraform | Commvault | PowerShell | Jira | ServiceNow | Azure boards | Azure pipelines | Cost management | Azure monitor | Log analytics | Azure IAAS | PAAS | troubleshooting | Datadog | Azure policies

PROFESSIONAL EXPERIENCE

- AZURE PLATFOR ENGINEER | Sapiens Technologies | Bengaluru

Jun 2025 – present

 - Managed services including Azure application gateway, WAF, virtual machines, AKS, Storage accounts, and Load balancer, Troubleshoot and resolved Infrastructure and deployment issues to ensure high availability and reliability.
 - Configure and managed Azure Pipelines to automate build, test, and deployment workflow, enabling seamless CI/CD integration with azure devops improving release speed, reliability and availability.
 - Configure and managed azure Entra ID to enable secure identity management, SSO, and role-based access control, implemented conditional access policies and multifactor authentication in Azure AD across enterprise applications.
 - Configure and managed Azure Front Door to provide global load balancing, secure traffic routing, high availability for application
 - Implemented custom rules, WAF policies in Azure Front Door to optimize performance and enhance application security.
 - Managed and administered Azure Kubernetes services (AKS) clusters, ensuring secure deployment scaling and monitoring of containerized applications.
 - Managed Customer Managed keys (CMK) with SSL certificates for encrypting sensitive data across azure storage, SQL database, and Key vault for data protection requirements.
 - Implemented disaster recovery, and backup solution using azure site recovery and Azure Backup.
 - Managed IT operations through ServiceNow ITSM platform, handling incident tickets for production issues with priority-based SLA adherence, processing change requests following ITIL best practices with proper approval workflows.
- AZURE CLOUD ENGINEER | Tata Consultancy Services | Bengaluru

May 2022 – Jun 2025

 - Designed and Implemented azure infrastructure using YAML pipelines in Azure DevOps for streamline automation.
 - Developed and kept Infrastructure as Code (IAC) solutions with CLI, PowerShell, Bicep and Terraform to helping scalable and repeatable infrastructure deployments, troubleshoot and resolved pipeline errors, ensuring minimal disruption to deployment processes.
 - Managed Azure network components including V-nets, subnets, NSG and firewall policies to secure network traffic management.
 - Configured and managed Azure Application gateway, WAF, Custom rules, Policies, for secure and scalable application delivery.
 - Automated resources provisioning and management for azure resources like Virtual machines, Storage accounts, Azure networks and utilized deployment tools and scripting for automation tasks, including operational efficiency and consistency.
 - Implemented security best practices across azure environments, including threat detection, patching, vulnerability management and remediation to safeguard infrastructure and applications.
 - Create and managed azure key vault and control access to encryption keys (CMK, MMK), certificates and secrets.
 - Monitored system performance using azure monitor, log analytics, Datadog, and implemented measures to solve potential issues.
 - Administered Entra ID for managing User identities, roles and access permissions, Used Microsoft defender for improving security posture to continues access to azure and protect workloads, threat detection and alert for resources.
 - Worked on incident for performance issues, conducted root cause analysis, and implemented corrective measures to improve reliability.
 - Ensured prompt resolution of incident with ServiceNow, Jira within prescribed SLA to improve efficiency of resources.

EDUCATION

BACHELOR OF ENGINEERING | Visveswaraya technological university

2016 – 2020

CERTIFICATION

- Microsoft Certified: Azure Administration Associate AZ-104 (May 2023)
- Microsoft Certified: Azure Fundamentals AZ-900 (Dec 2022)

KEY ACHIVEMENTS

- Data Migration to Azure: Successfully led a data migration project with goal of delivering data from our storage account to over fifty data consumers within sixty working days. We exceeded this target, completing the migration ahead of schedule, and received award for our efforts.
- Resource Migration and Cost Savings: Contributed to the migration of Azure resources from FSCP2.0 to FSCP 3.0, resulting in annual cost savings of \$213,00 and reducing manual effort by 300 working hours through automation, this achievement earned our team the Best team award.
