

SNAPSHOT:

- ❖ A competent professional with 10 + years relevant experience in Software Development in Informatica power center/IICS, Oracle and Unix.
- ❖ Having Knowledge of Data warehousing concept, hands on **Informatica, Oracle, UNIX and Informatica Cloud (IDMC).**
- ❖ Created Mapping, **Mapping configuration task, synchronization task, saved query, customized query, Application Integration tasks** including **Service Connectors, App Connections, Process Objects in IDMC.**
- ❖ Created mappings and workflows using Informatica
- ❖ Tested and troubleshoot mappings and workflows.
- ❖ Created and managed users
- ❖ Created and managed database connections to various data store
- ❖ Created and managed users and Logs
- ❖ Translated business requirements into Informatica mappings and IICS jobs.
- ❖ Involved in code migration from Dev to different environment.
- ❖ Good Exposure to Unit Testing using **SQL.**
- ❖ Involved in Scheduling Informatica workflow through **Autosys** and Informatica Scheduler
- ❖ Involved in maintenance and enhancement of the codes.
- ❖ Good Exposure on **GCP (GCS bucket, BigQuery).**
- ❖ Good knowledge on **PySpark.**

COMPUTER PROFICIENCY:

Operating Systems	WINDOWS 7, LINUX
Languages	SQL, PL/SQL, Python
Databases	Oracle, BigQuery, Synapse, Snowflake
Cloud Platforms	GCP (GCS-Bucket, BigQuery), AZURE (Blob-Storage, Synapse, DataBricks), AWS S3 Bucket
Scheduler	Autosys, Airflow
Tools	Informatica Cloud (IICS-CDI) , Informatica Powercenter 8.6.1/9, SQL Developer, Toad, Git, Jira, SQLPLUS

PROFESSIONAL EXPERIENCE:

PROJECT-1: -Hyatt (EDW to HDP Migration)

Organization: - Harman connected service

Project Name: - EDW to HDP Migration

Duration: - Jan 2023 to June 2025

Description: - It's a migration project from on Prem -DB2 and AWS redshift to Snowflake using IICS from the existing Informatica PowerCenter code.

RESPONSIBILITY: -

- ❖ Designed and implemented mappings, mapping tasks , and taskflow for batch time data integration.
- ❖ Worked on parameterized mappings for reusability.
- ❖ Developed data synchronization and replication tasks to load data from different sources targets Snowflake using the storage S3 bucket.
- ❖ Optimized data pipelines for better performance.
- ❖ Implemented error handling, audit, and logging frameworks to ensure reliable data processing
- ❖ Designed and developed Application Integration tasks including Service Connectors, App Connections, Process Objects, and Guides to enable API-based real-time integrations.
- ❖ Built and deployed REST/SOAP APIs and event-driven workflows to integrate cloud and on-premise applications.
- ❖ Worked on Testing of the code using Manual validation, using DVT (Data Validation tool).
- ❖ Developed and maintained **PySpark jobs**.

Tool used: - IICS -CDI & CAI UI, Databricks
Database used: -AWS, Snowflake
Language: -SQL, PYSPARK
Operating System: -UNIX

PROJECT-2: - Data Engineering

Organization: - Wipro

Project Name: - CDW

Duration: - Sept 2021 to 15th July 2022

*Description: - This is a migration project built on using **Talend** and **SQL server** to **IICS** and **Big query**. The main goal is to create reusable framework for business users.*

RESPONSIBILITY: -

- ❖ Involved in analyzing the existing framework.
- ❖ Involved in designing the framework.
- ❖ Technically lead the team.
- ❖ Created Mapping, mapping task, task flow.
- ❖ Worked in parametrization, Param set, parameter files, input parameter, in out parameter, task flow level parameters.
- ❖ Worked on IICS-CDI services.

Tool used: - IICS UI,
Database used: -Big query, GCS bucket as storage system.

PROJECT-3: - PWDW

Organization: - Wells Fargo

Project Name: - Consumer Banking

Solution Area Project: - Banker Profile

Duration: - Nov 2020 to Sept 2021

Description: - The main goal of this project is to maintain the core business table to be used by other downstream system and maintaining the authority to individual banker with respect to their job.

RESPONSIBILITY: -

- ❖ Involved in analyzing and fixing the prod issue.
- ❖ Involved in parametrization the connection strings.
- ❖ Involved in mass load process.
- ❖ Involve in maintaining core tables of the PWDW system which used in other downstream system inside the PWDW project.

Tool used: - Informatica PowerCenter 10.2, SQL developer 17.0, UNIX

Database used: -Oracle

PROJECT-4: - *Claim Smart*

Organization: - *IBM India Private Limited*

Client: - *CHUBB Insurance*

Solution Area Project: - *Claim Smart*

Duration: - *Jan 2019 to Oct 2020*

Description: - The main purpose of this project is to deliver Claim Smart reports leveraging the AIP Data Lake and CBD to centralize and normalize data from multiple Claim data sources.

RESPONSIBILITY: -

- ❖ Involved in requirement analysis
- ❖ Responsible to create **Synchronization task, mapping configuration task, mapping** and monitoring My jobs.
- ❖ Involve in creating **task flows and published** them for scheduling.
- ❖ Worked on **parametrization** of each component mapping. Worked on for **IN-OUT** parameter
- ❖ Monitoring the Task flow and Checked the Logs file and verify the process.
- ❖ Verify the record by using Input source file and target files
- ❖ Involved in code migration to different environment and in shakedown testing.
- ❖ Prepared Unit test case along technical coding.
- ❖ Involved in code change with unit testing.
- ❖ Involved in creating LLD.
- ❖ Guide the team to start with IICS code.
- ❖ Created Task flow.
- ❖ Work on in-out parameters.
- ❖ Involved in creating informatica PowerCenter mapping, workflow.

Tool used: - IICS UI,

Database used: -Azure blob storage as storage system, synapse

-

PROJECT-5: - *ANDARTarya*

Organization: - *IBM India Private Limited*

Client: - *AbbottLab*

Solution Area Project: - *AbbottLab*

Duration: - *July 2017 to April 2018*

Description: -

This project is about conversion of ANDARD Datawarehouse project which is developed in informatica power center 10 in on premises to Azure synapse Datawarehouse using IICS.

RESPONSIBILITY: -

- ❖ Involved Import of the Informatica PowerCenter XML extract into IICS.
- ❖ Validated the IICS-mapping as per Informatica power center.
- ❖ Involve in UTC preparation.

Tool used: - IICS UI,

Database used: -Azure blob storage as storage system, synapse

PROJECT-6: - TD Bank (Toronto-Dominion Bank)

Organization: - IBM India Private Limited

Client: -TD Bank

Solution Area Project: -RISE (RISK Information Strategy for the Enterprise)

Duration: -Jan 2016 to July 2017

Description: -

RISE is a data warehousing application which is being used to address involving risk information, data, reporting requirements and promote an enterprise approach through more effective and efficient use of data and technology. Its goal is to optimize the risk reporting environment and create realizable gains and cost saving for the organization across the bank. The rise program is comprised of multiple work streams which will develop an institution-wise ability to manage risk through more effective and efficient use and presentation of data and technology.

RESPONSIBILITY: -

- ❖ Involved in requirement analysis
- ❖ Responsible to create mapping, Designing, and Workflow monitoring.
- ❖ Monitoring the Workflow and Checked the Logs file and verify the process.
- ❖ Verify the record by using Input source file and target files
- ❖ Prepared Unit test case along technical coding.
- ❖ Involved in code change with unit testing.
- ❖ Prepared test cases for those script, Validated the **Informatica Mapping** and **Workflow**.
- ❖ Involved in Monitoring, maintenance and enhancement of the codes.

Tool used: - ETL Informatica (Version: -9.5.1), Toad 10.1

Database used: -Oracle 11g

PROJECT-7: - BMO (Bank of Montreal)

Organization: -IBM India Private Limited

Client: - BMO (Bank of Montreal)

Duration: -March 2015 to Jan 2016

Solution Area Project: BWAR (Bank Wide Asset Reconciliation) Migration to Netezza.

Description: -

BWAR is a data warehousing application which has been developed by Abinitio and Oracle and it explains the difference on a specified date between the bank balance shown in an organization's bank statement.

RESPONSIBILITY: -

- ❖ Involved in requirement analysis
- ❖ Written the corresponding Netezza SQL and PL/SQL code
- ❖ Verify the record by using Input source file and target files
- ❖ Prepared Unit test case along technical coding.

- ❖ Involved in code change with unit testing.
- ❖ Prepared test cases for developed script, Validated data.
- ❖ Involved in Monitoring, maintenance and enhancement of the codes.

Database used: -Netezza 7.2.1

PROJECT-8 CIBC (Canadian Imperial Bank of Commerce)

Organization: -IBM India Private Limited

Client: -CIBC-BBCP - Iteration - 3 and 4

Solution Area Project: BBCP (Business Banking Customer Profitable)

Duration: -Sept 2014 to Mar 2015

Description: -

Business Banking Customer Profitability is a data warehouse application undertaken to replace the old profitability application for Business Banking called 'Client RAROC (Risk Adjusted Return on Capital) and CRR (Client RAROC Reconciliation).

Currently the Client RAROC (Risk Adjusted Return on Capital) is Business Banking's primary tool for tracking client returns for business decisions and performance management. The actual risk-adjusted client returns are reported monthly by region and relationship manager using a web-user interface. Client RAROC is currently only used for Business Banking clients in the over \$5MM credit segment.

Client RAROC falls far short of being an automated process – it involves manual entry of data and many process interventions and hence it will be replaced by BBCP application for an automated world of Customer Profitability for \$0 to over \$5 MM credit segments for all non-personal products across CIBC.

RESPONSIBILITY: -

- ❖ Involved in requirement analysis
- ❖ Responsible to create mapping, Designing, and Workflow monitoring.
- ❖ Monitoring the Workflow and Checked the Logs file and verify the process.
- ❖ Verify the record by using Input source file and target files
- ❖ Prepared Unit test case along technical coding.
- ❖ Involved in code change with unit testing.
- ❖ Prepared test cases for those script, Validated the Mapping and Workflow.
- ❖ Involved in Monitoring, maintenance and enhancement of the codes.

Tool used: - ETL Informatica (Data Power Center V9.1), Aginity workbench, Autosys

Database used: -Netezza

PERSONAL DETAILS:

Father's Name	:	Late Mr. Hemanta kumar Rout
Marital Status	:	Married
Sex	:	Female
Nationality	:	Indian
Passport No	:	M1883551
Address	:	Sarjapur, Bangalore: -560087

All the Information declared hereby is correct and true to the best of my Knowledge.

Place: Bangalore, India
