CAREER OBJECTIVE

To work in a firm with a professional work driven environment where I can utilize and apply my knowledge, skills which would enable me to grow while fulfilling organizational goals.

EXPERIENCE SUMMARY

- Total Years of Experience **9 years and 2 months**.
- Good Knowledge in the **Embedded C Programming, Basic C++ 14** .
- Good Experience on **Automotive Domain**
- Software development working experience based on **V- Model**.
- Good Knowledge on Automotive Software development especially in, **ADAS, Power Steering System**.
- Working experience in Classic **Autosar** Components **DCM(UDS)**, DEM supported **COM,BSWM,NVM, RTE** ,non Autosar Components **EDR** (Even Data Recorder),FCU.
- Working experience in Adaptive Autosar in System Projects, Diag Proxy Development.
- Working Experience in configuration management tools like **Davinci Pro RTE, Davinci Developer, EB TRESOS, Eclipse, Jazz, IBM Rational DOOR's, ClearCase, ClearQuest**.
- Good Knowledge on Communication Protocol **SPI, I2C, UART and CAN, CANFD, Ethernet**.
- Good Knowledge on the Vector tools like **Canoe, Candela Studio** etc.
- Working experience in Unit Testing with Unit Design Requirement, QAC, Google Testing
- Performed end-to-end **ISO 26262 safety lifecycle activities** from HARA to verification for ASIL-B/ASIL-D systems
- Ensured compliance with **ASPICE Level 2/3** and traceability in requirements management.
- Possess **excellent interpersonal, communicational and organizational skills**.

PROFESSIONAL EXPERIENCE

Current Employer: **Continental Automotive Components India Pvt Ltd Bangalore**

Designation: **Embedded SW Developer**

Experience: **6 years (Dec-2019 to till now)**

Project: **ADAS: Short Range Radar, Long Range Radar, Advance Driver Control Unit - ADCU500**

Tools Used: **Davinci Pro RTE &Developer, AUTOSAR Builder, Linux system(qnx,Ubuntu), Candela studio, EB TRESOS,Vector Canoe, Lauterbach, Jira, Jazz, Eclipse**.

Nature of work:

- Working as developer for **AUTOSAR** modules.
- As per DCM, DEM Requirement implementing Diagnostic services, Testing with Bench Setup, Update CDD in **Candela studio**.
- As per new feature will write the requirement in **Jazz** reviewed with respective stockholders. making Linking with L2, updating mandatory Aspects.
- As T Shaping working methodology worked in **COM** Module for signal and channel mapping make it communication up and Running.
- Worked in **BSWM** for Mode, task, action list update for Startup process.
- Worked in **NVM** for block creation for request make it up and running

- Worked in **RTE** for port creation and mapping, task mapping generation of RTE.
- Worked **Even Data Recorder** monitoring errors are properly recorded or not.
- Debugging and resolving issues whenever Problem report raised, and supported different projects Honda, Daimler, Tata, Nissan.
- Worked in **JIRA** for story creation, Updating status of work in every sprints.
- Giving Training for Graduate Engineer and New Employees.

Previous Employer: **Robert Bosch Engineering India -client (US Technology International Pvt Ltd)**

Designation: **Embedded SW Developer**

Experience: **10Months (2019 Feb – November)**

Tools Used: **Tessy4.14, DOOR'S, Clear Case, Clear Quest, Enterprise Architect Tool**

Project title: **Safety Guardian Module Software development (Automotive Power Steering)**

Nature of work:

- As per the **Requirement Implementing Code and Unit Testing** done for Developed C file.
- Develop the software module. Architectural and low-level design using the Enterprise Architect Tool.
- Find the bugs in developed C file at early stage, and report to Developer.
- Creating Test case, validate the C file and **verified** with requirement.
- Perform and Analysis C file with boundary conditions.
- We write **Stub code** and **Advanced stub** also created at required function. We check our stub code is run and check actual output with expected output.
- Unit Testing done and ensure the c file is Error free and generating Test Report and Requirement Execution Report and raise review.
- Daily report our work and update our status to scrum master, and supporting to team member for finish the task to sprint end

Project description:

This Module development is based on the Renesas V850 Px4 Microcontroller, it is developed to detects the errors reported by Microcontroller, System ASIC of Steering ECU, whenever the error is detected this module take the necessary action and logged the Error, finally moves the system to safety state.

Previous Employer: **Indus Electronics India Pvt Ltd Coimbatore**

Designation: **Embedded Engineer**

Experience: **2 Year 4 Month (June 2016 to Oct 2018)**

Project title: **Spinning Machine Speed Control**

Nature of work:

- Develop and implement software for devices and systems.
- Printed Circuit Boards Test and Products Testing and Servicing.
- Analyze, monitor and improve efficiency, stability of the system.
- Assist in documenting project phases and creating summary report.
- To test the Functionality of the developed System with Hardware.

Project description: This Project is based on the MSP430F5418 Microcontroller, and its main objective is to improve the production rate in spinning mill, it controls the speed of motor based on customer define speed in respective shift length of thread, such measurement is possible by specially designed Inductive type proximity sensor.

EDUCATIONAL QUALIFICATIONS

COURSE	INSTITUTE	PERCENTAGE	YEAR OF PASSING
B.E (EEE)	Hindustan College of Engineering and Technology, Coimbatore	75%	2015
HSC	PSG Sarva Jana Higher Secondary School, Coimbatore	87%	2011
SSLC	Suburban Higher Secondary School, Coimbatore	90%	2009

ACADEMIC PROJECT DETAIL

- Automatic Treadmill Speed Control Based on Heartbeat

PERSONAL TRAITS

- Willing to learn and adapt to new opportunities and challenge.
- Team Management and the Leadership quality.
- Willing to travel across the world for any business needs.

DECLARATION

I hereby declare that the above-mentioned information is true to best of my knowledge.

Thanking You
