WORK EXPERIENCE

Quince (91Social) - SDE-3 (Storefront Platform & Martech)

Bengaluru, India
April 2025 - present

SDE-III (Platform engineer)

Quince

- Migrated the entire website off-CDN to enable **per-user personalization** at scale, unlocking server-driven rendering without compromising performance during peak traffic.
- Shifted **Statsig** experiments from client-side to server-side evaluation, enabling deterministic UI decisions and reducing client load during high-concurrency events.
- Implemented **experiment-based UI** for Collection Pages, safely rolling out BFCM variants with real-time observability.
- Scaled SSR and BFF services to handle BFCM peak traffic (4x–5x normal load), serving **~500K SSR requests/day** and 3.8M+ BFF requests/day while maintaining p95 SSR latency **<70ms** and p95 BFF latency **<50ms**.
- Coordinated autoscaling and pod health across 2,000+ SSR pods and 1,200+ BFF pods, keeping CPU and memory utilization under safe thresholds throughout the sale window.
- Led **CAPI & Marketing Pixel** integrations (Meta, Reddit, Snapchat) using WebGTM + Server-GTM; launched Reddit CAPI on time and secured \$10K in ad credits ahead of **BFCM**.
- Owned on-call & incident response during peak sale hours—resolved 5x spikes, shipped late-night hotfixes, and maintained site stability using **OpsGenie**, **Datadog**, **ArgoCD**, with content workflows via **Retool** & **Contentful**.

Zillit

Delhi, India

SDE-II

November 2023 - December 2024

Zillit-web

- Modernised the web app from beta, architecting the frontend with **Vite**, **React**, **Redux**, **Dexie**, and **leading** a small dev team.
- Delivered core features: secure auth, a Google-style **calendar**, and a **real-time** C&C module (chat, calls, video) via WebSockets with **encrypted** media sharing.
- Built E2E encryption, service-worker **notifications**, and Firebase **FCM background alerts**.
- Helped scale the platform for global clients, including **BBC**, **Netflix**, **Prime**, and **Film Finance**.

Antino Labs

Gurugram, Haryana, India

React Js Developer

July 2022 - June 2023

LIC Mutual Fund (Kfintech)

- Helped it to **migrate** from .net based web application to react JS, node Js web application and used a modern UI design.
- Created many new modules. one specific thing is that I created a page that handles **15 separate business modules on a single page**. It was made easy by having as many reusable components as possible and using redux to manage the state of the app
- It's a fintech product so we have to protect our user's data so we **encrypted** all the data to secure every detail of the user using **SHA256** - cryptographic hash function

TREATMENT TRAVELLER

Noida, Uttar Pradesh, India

Frontend Web Developer

Dec 2020 - Jul 2022

Hosplan

- Created hosplan using react.js that helps users to search and find the best hospitals and doctors available in India. Users can book direct appointments with doctors through the application.

EDUCATION

Loyola Institute of Technology

Chennai, Tamil nadu , India

Bachelor of engineering in computer science

SKILLS & INTERESTS

React JS, Next Js, JavaScript, TypeScript, Redux, Jest, HTML, CSS, Material UI, GitHub, Webpack, CI/CD, Node Js, Python, Headless CMS Strapi, Sanity and Axios.

TOOLS

WebGTM, Server-GTM, Retool, Contentful, AWS (S3/CloudFront), Statsig, Confluence, Mixpanel, Datadog, OpsGenie, SonarQube, ArgoCD, Sentry

- I read and write blogs @dev.to in my free time, and I am **one of the content moderators** on this forum. This is my [profile](#) there
