PROFESSIONAL SUMMARY

Python AI Engineer with 7+ years of experience building production-grade AI systems and 1+ year specializing in LLM-powered Agentic frameworks and RAG architectures. Expert in designing end-to-end Retrieval Augmented Generation pipelines using LangChain and LlamaIndex with vector databases, embeddings, prompt engineering, tool usage, and memory-driven agents. Strong hands-on experience deploying LLM and agent workflows on AWS Bedrock with FastAPI microservices, Docker, and CI/CD. Experienced in building autonomous decision-making systems integrating LLMs, streaming data, and enterprise APIs.

EXPERIENCE

Module Lead

Jan 2024 – Sep 2025

ACL Digital

Bangalore, India

- Architected and owned a **production-grade Agentic GenAI platform** processing **2M+ events/day**, delivering autonomous, LLM-driven decisioning and reducing manual investigation by **40%**.
- Designed and deployed **end-to-end RAG architectures** using **VectorDBs, embeddings, and prompt engineering**, enabling high-precision, context-aware retrieval for downstream GenAI services.
- Built **agent-based LLM workflows** with **LangChain, LlamaIndex, and LangGraph**, incorporating **tool usage, memory-driven agents, FastAPI microservices, and LangFuse** for scalable orchestration and autonomous reasoning.
- Led **production deployment and evaluation of LLM and agent systems on AWS Bedrock**, implementing CI/CD, Dockerized services, and **LLM evaluation metrics** to achieve **99.9% uptime** and reliable agent performance at scale.

Senior Application Developer

Sep. 2023 – Dec 2023

IBM

Bangalore, India

- Integrated AI/ML workflows into production systems, automating large-scale data-driven decision-making and enabling LLM/agent-powered applications.
- Built and deployed scalable APIs and streaming pipelines (Kafka, REST) to serve real-time ML/LLM inference for high-throughput platforms.

Technology Analyst

May 2018 – Aug 2023

Infosys Ltd.

Bangalore, India

- Developed backend logic in Python to implement a statewide underwriting model for New Jersey State, generating policy quotes for 500,000+ customers and contributing to a measurable increase in revenue and sales..
- Owned end-to-end development of Anomaly Detection Strategy by making use of Python with IsolationForest model.

EDUCATION

Srinivas School of Engineering

Bachelor of Engineering (Computer Science)

Mangalore, India

Jun. 2013 – Jun 2017

TECHNICAL SKILLS

- **GenAI & Agentic Systems:** LLMs, Retrieval-Augmented Generation (RAG), Embeddings, Vector Databases, LangChain, LangGraph, LlamaIndex, Prompt Engineering, Agents, Memory, Tool Usage, Evaluation Metrics, LangFuse, Bedrock
- **APIs & Services:** FastAPI, RESTful Microservices
- **Programming Language:** Python
