PROFESSIONAL PROFILE

ServiceNow Developer & Administrator with **4+ years of experience** delivering ITSM solutions across enterprise environments. Strong hands-on expertise in ServiceNow configuration, customization, and administration with proven ability to translate business requirements into scalable technical solutions. Experienced in working with global clients, release management, and cross-functional teams.

CORE COMPETENCIES

- ServiceNow ITSM (Incident, Problem, Change, Request)
 - Service Catalogs & Record Producers
 - Client Scripts, Business Rules, Script Includes
 - UI Policies, UI Actions, Data Policies
 - Workflows & Flow Designer
 - ACLs & Security Configuration
 - Update Sets & Instance Migration
 - Import Sets & Transform Maps
 - Reports, Dashboards & SLA Management
 - User, Role & Group Administration
-

TECHNICAL SKILLS

Platform: ServiceNow (ITSM)

Scripting: JavaScript, HTML

Tools: Update Sets, Import Sets, Transform Maps

Other: MS Office

PROFESSIONAL EXPERIENCE

TCS – Bangalore

ServiceNow Developer & Administrator

Duration: 3+ Years

ServiceNow Developer with strong hands-on experience in designing, configuring, and optimizing enterprise-scale ServiceNow solutions **across ITSM, CSM, GRC/IRM, and ITOM** modules. Proven expertise in implementing end-to-end service management processes aligned with **ITIL v4** and modern digital workflow standards. Adept at developing advanced **client scripts, business rules, UI policies, Script Includes, and Flow Designer workflows** to automate service delivery, enhance user experience, and improve operational efficiency.

Experienced in **configuring Service Catalogs, record producers, dynamic approvals**, and lifecycle **workflows** to support scalable service fulfillment and customer engagement. Demonstrated ability to implement robust **security and compliance controls** using role-based access (**RBAC**), **ACLs**, and **data policies** in line with enterprise governance standards. Skilled in instance management, update set migrations, and release coordination across multiple environments.

Actively involved in requirement analysis and stakeholder collaboration to deliver high-quality platform enhancements supporting IT operations visibility (**ITOM**), risk and compliance automation (**GRC/IRM**), and customer-centric service models (**CSM**). Continuously aligned with ServiceNow best practices, platform upgrades, and emerging trends such as automation-first design, integration readiness, and performance optimization.

KEY PROJECTS

Project 1: Loan Depot – MIM

Role: ServiceNow Developer

Client: Loan Depot

Overview: Implemented ITSM modules and customized service catalog solutions to streamline service delivery.

Key Contributions: -

- Implemented and configured ServiceNow **GRC/IRM** modules including Risk Management, Policy and Compliance, Issue Management, and Controls to support enterprise governance and regulatory requirements.
- Designed and developed advanced UI Policies, Client Scripts, Business Rules, Script Includes, and Data Policies to enforce risk lifecycle automation, validation, and conditional logic across IRM processes.

- Implemented secure role-based access control (RBAC) using ACLs, roles, and user criteria to ensure data confidentiality, segregation of duties, and compliance with audit standards.
 - Integrated ServiceNow **GRC/IRM** with third-party systems and internal applications using **REST/SOAP APIs**, IntegrationHub spokes, MID Server, and scripted REST APIs for real-time risk, compliance, and audit data exchange.
 - Configured authentication and authorization mechanisms including OAuth 2.0, Basic Auth, and token-based security for external system integrations.
 - Automated risk assessments, control testing, policy acknowledgements, and issue remediation workflows using Flow Designer and Workflow Editor to improve compliance tracking and operational efficiency.
 - Developed and customized forms, views, and related lists to enhance usability for risk owners, compliance teams, and auditors.
 - Performed data imports, transformations, and reconciliation using Import Sets and Transform Maps to onboard risk and compliance data from external sources.
 - Managed configuration migrations and release activities across multiple instances using Update Sets, ensuring platform stability and alignment with ServiceNow best practices.
 - Collaborated with business stakeholders, risk teams, and compliance officers to gather requirements, implement enhancements, and support continuous improvements aligned with enterprise governance frameworks.
-

Project 2: Yeshiva University

Role: ServiceNow Developer & Administrator

Overview: Developed and customized ServiceNow applications to support enterprise service management processes.

Key Contributions: -

- Administered and managed users, groups, roles, and role hierarchies across the ServiceNow platform, implementing role-based access control (RBAC), user criteria, and ACLs to ensure secure access and compliance.
- Designed and configured inbound email actions integrated with SolarWinds, leveraging scripted conditions and parsing logic to automate incident creation, enrichment, prioritization, and assignment.
- Developed and customized ServiceNow client scripts, UI policies, business rules, and script includes to enforce dynamic form behavior, data validation, and server-side automation.
- Designed and maintained surveys, SLAs, notifications, and scheduled reports using Performance Analytics and reporting frameworks to track service performance and operational KPIs.
- Built and enhanced Service Catalog solutions using catalog items, record producers, variables, variable sets, approvals, and workflows/Flow Designer to support standardized and automated

service fulfillment.

- Configured and optimized Change Management processes including change workflows, assignment rules, approval policies, change models, and conflict detection aligned with ITIL v4 best practices.
- Developed and maintained workflows and Flow Designer flows to automate approvals, task orchestration, notifications, and integrations across ITSM processes.
- Implemented data integrations and imports using Import Sets, Transform Maps, scripted transforms, and scheduled jobs to synchronize data from external monitoring and enterprise systems.
- Created and customized forms, views, related lists, and UI actions to improve user experience and operational efficiency.
- Monitored platform health, performed instance maintenance, resolved performance issues, and supported upgrades while adhering to ServiceNow development standards and best practices.
- Migrated configurations across environments using Update Sets, ensuring version control, impact analysis, and release stability.

EDUCATION

B.Tech – KSRM College Of Engineering Kadapa in the year of 2021 (JNTUA)
