

MUNISH VERMA

FRONT END DEVELOPER

PHONE | (+91) 9501225230
EMAIL | munish.verma12@gmail.com
LOCATION | Bengaluru, INDIA
EXPERIENCE | 10 Years 1 Month

Key Skills

- Html5
- Javascript
- CSS
- React.Js
- Docker
- GIT
- Power BI
- Bootstrap
- Rest API Integration
- Node.Js
- Microservices
- Backend
- Azure DevOps
- Load Balancing
- Nginx

Languages

- English
- Hindi

Architectural & Design Strengths

Profile Summary

Senior Full Stack Engineer with 10+ years of expertise in designing, developing, and scaling enterprise-grade web applications. Proficient in React-based micro-frontends, Node.js microservices, and distributed system architecture. Skilled in building scalable, multi-tenant SaaS platforms with complex backend integrations and high-performance UIs. Extensive hands-on experience throughout the software development lifecycle, including system design, deployment, and ensuring reliability. Specializes in modular frontend architectures, RESTful backend services, and cloud-native deployments. Experienced in enterprise domains such as manufacturing (PLM/3DEXPERIENCE ENOVIA) and large-scale business applications. Committed to delivering innovative, robust, and scalable software solutions.

Work Experience

Front End Developer

Zapbuild

06/2021 - 09/2024

- Developed user interfaces with React, Power BI, Tailwind CSS, Formik, and React Hook Form.
- Integrated complex business logic with APIs.
- Created multiple websites and POS systems, working on various projects using mentioned skills.
- Implemented Power BI dashboards to consolidate data from multiple sources, improving decision-making speed and accuracy.

- Frontend architecture design for large-scale applications
- Microservices communication (HTTP-based, async messaging concepts)
- Scalable UI systems using modular & domain-driven design
- Performance optimization & reliability-focused design
- API gateway & service boundary understanding
- Secure authentication flows (access & refresh token strategies)

Core Technical Skills

- **Frontend Engineering**
 - React.js, JavaScript (ES6+), HTML5, CSS3
 - Redux, Material UI, Bootstrap
 - Micro-Frontends (Module Federation – conceptual & practical)
 - Vite, Responsive UI Design, Reusable Component Libraries
- **Backend & System Design**
 - Node.js, REST APIs, Microservices Architecture
 - Backend Integration, Authentication & Authorization (JWT-based flows)
 - Event-driven design (conceptual understanding with Kafka/RabbitMQ)
- **DevOps & Deployment**
 - Docker (containerization fundamentals)
 - Azure DevOps (CI/CD pipelines)
 - Git, GitHub, Version Control
 - Basic Kubernetes concepts (Pods, Services, Deployments – conceptual)
- **Data & Analytics**
 - REST API Integration
 - Power BI (reporting & visualization)
 - Tools & Platforms
 - JIRA, GitHub, Azure DevOps
 - WordPress (custom development & integrations)

Social links

Front End Developer

Net Solutions

02/2016 - 06/2021

Developed user interfaces with React and integrated APIs.

Optimized a website, achieving a Google PageSpeed score above 95%.

Created multiple websites and POS systems, working on various projects using mentioned skills.

Team Lead

SLK Software

09/2024 - Present

Team Lead Building and maintaining enterprise applications for 3DEXPERIENCE ENOVIA (Innovia 3DX SaaS) using React.js, Node.js, and Redux. Designed and developed interactive React.js applications and widgets, integrated with Node.js services for seamless front-to-back data flow. Developed custom widgets and tools for managing PLM lifecycle flows, including Create ? Review ? Release ? Implemented stages. Focused on performance optimization, clean architecture, reusable components, and real-time feedback mechanisms using Redux and modern JavaScript tooling.

Education

B.Tech/B.E. - Energy

2009

Punjab Technical University (PTU)

Grade - 56%

Projects

Shopatreach (Zapbuild)

60 Days

Created virtual address and package shipping service using React, Javascript ,React Bootstrap, and integrated into Laravel.

<http://shopatreach-qa.zapbuild.in/>.

Project Duration Date: March 2024 - May 2024

FreightBnb (Zapbuild)

- <https://www.linkedin.com/in/munish-verma12>

31 Days

Developed for Transportation and Logistics business using WordPress, Javascript with Lottie and SVG animations.

<https://www.freightbnb.com/>

Project Duration Date: April 2022 - May 2022

Bottle POS (Zapbuild)

1251 Days

A Point of Sale (POS) system for a US-based liquor store using React.js, React Bootstrap, Electron App, Node.js, Docker, Redux, Javascript and Git. Implemented service workers for offline functionality.

Aws deployment

<https://app.bottlepos.com/>

Project Duration Date: June 2021 - January 2024

The Fashion Verse (Zapbuild)

59 Days

Developed using React and Material UI, Redux, storing avatars for dresses in Ethereum blockchain using MetaMask.

<https://marketplace.thefashionverse.io/>

Project Duration Date: June 2023 - August 2023

Hevo (NetSolutions)

122 Days

Static website for wireless charging products, including UI creation, Javascript and Lottie animations.

<https://hevo.com/rezonant-e8.html>

<https://hevo.com/>

Tentative Date: February 2016 - March 2019

Sampleboard (NetSolutions)

121 Days

Developed UI for a SaaS product for interior designers, funded by Google, and deployed code on client side.

Technology used - Javascript, bootstrap, HTML, CSS.

<https://www.sampleboard.com/>

GWA Caroma dashboard (NetSolutions)

59 Days

Web application for tracking water usage for an Australian bathroom products company.
Technology used - Javascript, bootstrap, HTML, high charts CSS.
<https://mabon.agilecollab.com/gwa/>

Emcure Pharmaceuticals Limited (NetSolutions)
31 Days

Developed company dashboard linking internal departments using Drupal.
<https://mabon.agilecollab.com/emc/>

Netsolutions Website (NetSolutions)
1127 Days

Maintained and optimized internal company website using WordPress and Divi page builder.
Technology used - Javascript, bootstrap, PHP, wordpress, Webpack HTML, CSS.
<https://www.netsolutions.com/>
Tentative Date: February 2016 - March 2019

EdPlace (NetSolutions)
607 Days

Developed UI for a digital collaboration platform for parents, ensuring pixel-perfect and browser-compatible designs.
<https://www.edplace.com/>
Tentative Date: March 2019 - November 2020

Law Offices of Cummings & Franck, P.C. (NetSolutions)
31 Days

Designed and developed website for an Employment Law Firm in Los Angeles using WordPress, CSS, and jQuery.
<https://www.cummingsandfranck.com/>
Tentative Date: February 2021 - March 2021

Captiv8 (NetSolutions)
850 Days

Developed UI and integrated code in WordPress for a project connecting brands with the world.
<https://captiv8.io/>
Tentative Date: October 2017 - March 2020

Euro car parts (NetSolutions)

100 Days

Multi-channel eCommerce solution, developed a clean and optimized website in WordPress.

<https://corporate.eurocarparts.com/>

Kerluxe ecommerce website (NetSolutions)

122 Days

Implemented designs in Magento2 environment, customizing elements and injecting custom HTML templates as needed.

<http://dev.kerluxe.com/>

Tentative Date: June 2020 - October 2020

UltraViral (Zapbuild)

18 Months

- Developed a user-centric web application for Ultra-Viral (UV), connecting celebrities, influencers, and fans through features such as marketplace, shoutouts, live sessions (one-on-one and group chats), personal appearances, direct messages, product promotions, an affiliate program, and premium content.

- Utilized React Bootstrap, Redux, and React for seamless design and API integration, ensuring a robust and dynamic application interface.

- Elevated visibility for celebrities and influencers by facilitating marketplace and promotional features, leading to a 30% rise in brand collaboration opportunities.

- Ensured flexibility and scalability of the platform by implementing React and React Bootstrap, enabling effortless management of a burgeoning user base and easy integration of additional features.

Project Duration Date - January 2023 - June 2024

Technology used - Bootstrap, Redux, React, HTML, CSS.

Lifecycle Management System for PLM (3DEXPERIENCE ENOVIA)

12 Months

Developed and maintained a robust Lifecycle Management System within the 3DEXPERIENCE ENOVIA (3DX)

PLM platform to manage engineering changes across stages like Create ? Review ? Release.

Worked on building custom React.js widgets and frontend modules integrated with backend services via Node.js. Enabled seamless task approvals, part validations, and state transitions across a global multi-tenant SaaS environment. Focused on user experience, performance optimization, and clean UI practices, ensuring consistency with enterpriselevel design systems. Collaborated across cross-functional teams to deliver reliable, scalable PLM solutions.
