Passionate Software Developer with 6+ years of hands-on full-cycle work experience and a strong computer science background.

WORK EXPERIENCE

Senior Software Engineer-II MakeMyTrip, Bengaluru [April 2024 - Present]	- Architected and built a unified One-UI for the bus funnel, driving a complete revamp of bus insights & BP-DP pages across MMT and GI - Automated Identification of Golden Query in Veritas, using LLM, vector-embeds & clusters - Created custom Adobe XDM schemas and implemented client-side mapping of user data for accurate ingestion into Adobe Experience Platform, enabling real-time analytics and segmentation. - Created GI Streaks from the ground up, enabling users to make consecutive bookings and unlock exciting rewards. - Built QueryNova - a GenAI-based web application to resolve customer escalations, reducing dev on-call support time by 30%. Built and optimized UI flows for assurance and insurance products, contributing to increased post-transaction revenue through seamless cross-sell and upsell experiences. - Revamped the entire listing page of the Bus funnel, improving funnel conversion by 2.38% in iOS & 1.04% in Android. - Accountable for performing thorough code reviews and providing mentorship to team members.
Software Engineer Paytm, Pune [October 2021 – April 2024]	- Responsible for developing H5 applications for smooth customer onboarding, payments, and customer plan subscription for Paytm Money. - Successfully migrated a Monorepo application to Micro-Frontend using Module Federation. - Responsible for designing Micro-Frontend architecture for several H5 and web applications. - Developed various reusable UI components and utilities, contributing to faster release cycle. - Worked on performance optimization of web vitals and build size of application. - Collaborated with cross-functional teams to design & develop various new user interfaces.
Software Developer AuthMind, Pune [April 2021 - October 2021]	- Responsible for developing web application to monitor risks and resolve identity threats in cybersecurity space. - Responsible for developing reusable UI components for the web application. - Responsible for integrating backend services with the frontend. - Developed various charting components to visualize risks and issues. - Improved web application performance by 20%.
Programmer Analyst Cognizant, Pune [February 2019 – April 2021]	- Responsible for frontend development using React.js as per the client requirements. - Responsible for developing REST API's using Spring Boot as per the client requirements. - Topped multiple assessments on Java, C, MySQL & tagged as an Orbit Shifter - Trained on AGILE methodology.

PROJECTS

Goibibo Bus React Native, TypeScript, Redux, StyleSheet	A hybrid application designed to offer customers an easy and convenient way to book bus tickets across multiple platforms.
Payments & Subscriptions React, JavaScript, SCSS, Webpack, Micro-frontend	An H5 MFE application to help customers manage their funds in the DEMAT account. A pluggable application to manage payments & subscriptions for different platforms like Equity and Mutual Funds.
Hybrid KYC React, JavaScript, SCSS, Webpack	An H5 application to help onboard customers hassle-free and make them investment-ready to use our equity & mutual funds platform.
AuthMind React, Highcharts, TypeScript, MongoDB	An enterprise web application to continuously discover, prevent identity and access risks & protect from cyber threats.
FERC MBR Spring Boot, React, Ant Design, TypeScript	A web application to allow the business attorneys to analyze, and maintain energy-related data & automate the manual process of filing to fulfill business requirements.

SKILLS

Programming Language	JavaScript, TypeScript, Java, HTML5, CSS3, XML, JSP, JSX, SASS, SCSS
Framework / Library	React.js, React Native, Redux, React Query, React Router, Universal Router, Material Design, Ant Design, Jest, Enzyme, Bootstrap, Highcharts, Spring MVC, Spring Boot, Hibernate
Databases	MySQL, PostgreSQL, DynamoDB, MongoDB
Tools	VS Code, Git, GitLab, BitBucket, Webpack, NPM, JIRA, Akamai, AWS, Docker, Postman, Figma, Zeplin, Github Copilot, Generative AI, GPT, Cursor

EDUCATION

Program	Institute	Year of Completion	CGPA
B.Tech. in Computer Science	DIT University, Dehradun	2019	7.85
