PROFESSIONAL SUMMARY

Lead Backend Engineer with **8.10+ years of experience** across **product-based and service-based environments**, delivering **scalable, secure, and high-performance backend systems**. Strong expertise in **Node.js, microservices, serverless, and event-driven architectures** on **AWS and Microsoft Azure**. Proven ability to work with **enterprise clients**, own backend modules end-to-end, contribute to system design, and mentor engineers while delivering reliable production systems.

CORE SKILLS

Languages: Node.js, TypeScript, JavaScript

Backend: Express.js, REST APIs, Microservices, Serverless, WebSockets

Cloud: AWS (Lambda, API Gateway, EC2, S3, SQS/SNS, CloudWatch), Azure (Functions, APIM, SQL, Key Vault, App Insights)

Datastores: PostgreSQL, MySQL, MongoDB, Redis

Messaging: Kafka, RabbitMQ

Security: JWT, RBAC, CORS, Joi

Quality: Jest, SonarQube, SonarLint

APIs & Tools: Swagger (OpenAPI), Postman, Bruno

DevOps: Docker, Azure Pipelines (CI/CD)

Observability: Application Insights, CloudWatch

Practices: System Design, Code Reviews, Mentoring, Agile/Scrum

PROFESSIONAL EXPERIENCE

Lead Backend Engineer / Custom Software Engineering Specialist

Accenture – Enterprise & SaaS Client Platforms | Bengaluru

Sep 2021 – Present

Reinvention Navigator (RN) – Enterprise SaaS Platform

- Designed and developed backend services for a **multi-tenant enterprise SaaS platform**, supporting multiple clients with secure data isolation.
- Implemented **serverless architecture using Azure Functions**, improving scalability and cost efficiency.
- Built secure and scalable **REST APIs** with JWT authentication and **RBAC**, meeting enterprise security standards.
- Optimized **Azure SQL** queries and stored procedures, improving API performance and reliability.
- Developed a **shared internal npm package** reused across services, improving code consistency and maintainability.
- Implemented monitoring and logging using **Azure Application Insights**, reducing production issue resolution time.

Worked closely with **client stakeholders**, participating in requirement discussions, estimations, and sprint planning. - **Led and mentored 6 junior engineers**, conducting KT sessions and code reviews.

Digital Omni-Channel Platform (DOCP)

- Developed **Node.js microservices** for omnichannel customer operations and telecom integrations. - Integrated backend services with **billing, order management, and network platforms**, including **Private 5G workflows**. - Built a **WhatsApp Chatbot** using WhatsApp Cloud API for customer interaction automation. - Deployed and supported services on **AWS**, ensuring secure and compliant environments.

Tech: Node.js, TypeScript, Azure Functions, Azure SQL, AWS Lambda, API Gateway, PostgreSQL

Senior Software Engineer / Lead Node.js Engineer

Wimera Systems Pvt Ltd – Product Company | Bengaluru

Apr 2017 – Aug 2021

IIoT & Real-Time Monitoring Platforms

- Designed and developed **product-based IIoT platforms** for real-time monitoring of CNC, welding, and molding machines. - Built **high-throughput backend APIs** for ingesting machine telemetry and generating dashboards and reports. - Implemented **event-driven architectures** using **RabbitMQ** to handle real-time data processing reliably. - Optimized **MongoDB and PostgreSQL** databases to improve reporting performance and scalability. - Collaborated with product managers and stakeholders on **feature design, system architecture, and release planning**. - Actively contributed to Agile delivery, ensuring high-quality and timely releases.

Tech: Node.js, MongoDB, PostgreSQL, RabbitMQ, AWS (Lambda, EC2, S3, SNS, SQS)

AWARDS & RECOGNITION

- **ACE Growth Catalyst Award (Global)** – Accenture, 2025
 - **ACE Skill Star Award (Global)** – Accenture, 2024
 - **Star Employee** – Wimera Systems, 2020 & 2018
-

CERTIFICATIONS

- Microsoft Certified: **AZ-204 – Azure Developer Associate**
 - Microsoft Certified: **AZ-900 – Azure Fundamentals**
-

EDUCATION

M.Tech – Computer Science, Basaveshwara Engineering College (2016)

B.E – Information Science, SDM College of Engineering & Technology (2014)

DOMAINS & LANGUAGES

Domains: SaaS Platforms, Enterprise Systems, IIoT, Telecommunications

Languages: English, Hindi, Kannada
