PROFESSIONAL SUMMARY

I am a passionate ServiceNow Professional with 4.5 years of experience in the administration, development and implementations of all phases of the application lifecycle which includes Requirement Gathering, Development and Deployment.

- **ServiceNow Platform Expertise:** Extensive expertise in customizing ServiceNow applications, leveraging platform tools to meet specific business needs effectively.
- **Technical Proficiency:** Extensive expertise in the ServiceNow platform, modules, capabilities, and configurations, ServiceNow development.
- **Problem-solving Acumen:** Strong analytical skills to troubleshoot, debug, and optimize custom applications.
- **Continuous Learning and Adaptability:** Readiness to adapt to new ServiceNow updates, features, and functionalities by engaging in continuous learning and staying updated with industry trends.
- **Proof of Concept:** Demonstrated ability to collaborate closely with sales teams, understanding pain points, and POC solutions that address specific business challenges.
- **Collaborative Approach:** Effective communication and collaboration with stakeholders, including business analysts and end-users, to gather requirements and ensure successful application development.

WORK EXPERIENCE

T-Systems ICT Pvt. Ltd.

📅 2021 - Present 📍 Pune, India

Software Engineer

- Developed custom applications for TSM and OMT on the ServiceNow platform with integrations to EMC and PMA-ISEM modules that support event and inventory management.
- Proficient in ServiceNow Flow Designer with hands-on experience in both client-side and server-side scripting.
- Strong working knowledge of core ITSM modules including **Incident** and **Problem Management**.
- Experienced in scripting components such as:
 - **Client Scripts, Business Rules, Script Includes**
 - **UI Policies, UI Actions, Data Policies**
 - **Process Automation Designer, Playbooks, Service Portal and AI Agent**
- Worked with **Reference Qualifiers, GlideRecord** and **GlideAjax**.
- Hands-on experience with **REST** integrations.
- Well-versed in configuring **Transform Maps, Transform Scripts, Import Sets, and Data Sources** for seamless data imports.
- Adept at configuring and triggering **Events** and managing the **Event Registry** for executing script actions and notifications.
- Managed full deployment and release lifecycle including:
 - Preparation of **runbooks**
 - Exporting and publishing applications using **Update Sets**
 - Deployment via **CI/CD pipelines**
